

CSA4001-MANAGEMENT INFORMATION SYSTEM FOR DATA OPTIMIZATION

NAME: K.KARTHIK

REG.NO.: 192110178

1. Draw a UML diagram for online purchasing system. Provide top level use cases for a web customer making purchases online. Web customer actor uses some web site to make purchases online. Top level use cases are View Items, Make Purchase and Client Register.

AIM

The aim is to design a **UML Use Case Diagram** for an **Online Purchasing System**, illustrating the interactions between a **Web Customer** and the system's main functionalities, such as viewing items, making purchases, and registering as a client.

PROCEDURE:

- Identify the primary actor: **Web Customer**.
- Define the top-level use cases: **View Items, Make Purchase, and Client Register**.
- Establish relationships between the actor and use cases using **association lines**.
- Include system boundaries labeled **Online Purchasing System** to define the scope.
- Use **include/extend** relationships where necessary, such as **Payment Processing included in Make Purchase** and **Confirm Registration extending Client Register**.
- Ensure logical flow, such as **Client Register** being an optional step before making a purchase.

- Finalize the diagram, ensuring clarity, completeness, and usability in system development.

OUTPUT:

USE CASE DIAGRAM:

RESULT:

The Hotel Reservation System UML diagrams were successfully designed, covering all necessary interactions, workflows, and system components. This provides a structured representation of the system for implementation.
