

CSA4001-MANAGEMENT INFORMATION SYSTEM FOR DATA OPTIMIZATION

NAME: K. Karthik

REG.NO.: 192110178

6) Draw a Use case diagram to model for a quiz system. A user can request a quiz for the system. The system picks a set of questions from its database, and composes them together to make a quiz. It rates the user's answers and gives hints if the user requests it. In addition to users, we also have helpers who provide questions and hints. And also, administrators who must certify questions to make sure they are not too trivial, and that they are correct.

AIM

To develop a Use Case Diagram for a Quiz System, representing interactions between users, helpers, and administrators for quiz generation, question answering, rating, and certification.

PROCEDURE:

- ☐ Identify actors: User, Helper, and Administrator.
- ☐ Define use cases: Request Quiz, Generate Quiz, Answer Questions, Rate Answers, Request Hint, Provide Questions, Provide Hints, and Certify Questions.
- ☐ Establish relationships: Generate Quiz is included in Request Quiz, Request Hint extends Answer Questions, Helpers provide questions and hints, and Administrators certify questions.
- ☐ Draw the system boundary labeled Quiz System and place actors outside and use cases inside.
- ☐ Connect actors with their respective use cases using association lines.
- ☐ Apply include and extend relationships where necessary.

- Verify the correctness and completeness of the diagram.

OUTPUT:

USE CASE DIAGRAM:

RESULT:

The Use Case Diagram for the Quiz System effectively represents the interactions of users, helpers, and administrators, ensuring a structured approach to quiz generation, question management, and certification.
