

CSA4001-MANAGEMENT INFORMATION SYSTEM FOR DATA OPTIMIZATION

NAME: K. Karthik

REG.NO.: 192110178

8) Describe major services (functionality) provided by a hospital's reception.

Summary: Hospital Management System is a large system including several subsystems or modules providing variety of functions. Hospital Reception subsystem or module supports some of the many job duties of hospital receptionist. Receptionist schedules patient's appointments and admission to the hospital, collects information from patient upon patient's arrival and/or by phone.

For the patient that will stay in the hospital ("inpatient") she or he should have a bed allotted in a ward. Receptionists might also receive patient's payments, record them in a database and provide receipts, file insurance claims and medical reports.

AIM

To describe the major services provided by a hospital's reception within a Hospital Management System, detailing its role in patient management, scheduling, and financial processing.

PROCEDURE:

- ☐ Identify Actors – The key users of the system, including Patient, Receptionist, Doctor, and Insurance Provider.
- ☐ Define Use Cases – List the primary functionalities such as Schedule Appointment, Register Patient, Allot Bed, Process Payment, File Insurance Claim, and Manage Medical Records.
- ☐ Establish Relationships – Connect actors to their respective use cases using association lines to represent interactions.

- ☐ Include System Boundary – Draw a box labeled Hospital Reception System to define the scope of the reception module.
- ☐ Use Include/Extend – Apply include for mandatory use cases like Register Patient included in Schedule Appointment, and extend for optional cases like File Insurance Claim extending Process Payment.
- ☐ Verify Completeness – Ensure all required functionalities are covered and properly linked with actors.
- ☐ Finalize and Review – Refine the diagram for clarity, correctness, and usability in system development.

OUTPUT:

USE CASE DIAGRAM:

RESULT:

The Hospital Reception Module efficiently manages patient scheduling, registration, bed allotment, payment processing, insurance claims, and medical records, ensuring smooth hospital operations.
